Five Point Summary

Prof.Y V K Ravi Kumar

Introduction

In this video we will discuss

- Five point summary of the data

Five – Point Summary

The Five-Point Summary is a quick way to describe the distribution of a dataset.

It is used in descriptive statistics

Five – Point Summary

The five-point summary consists of:

- Minimum – The smallest observation
- Q_1 (First Quartile) – 25th percentile
- Median (Q_2) – 50th percentile
- Maximum – The largest observation
- Q_3 (Third Quartile) – 75th percentile
- Five- Point Summary = {Min, Q_1 , Q_2 , Q_3 , Max}

Five – Point Summary

4,6,7,8,10,12,15,18,20,22

- Minimum: 4
- Maximum: 22
- Median(Q_2) = $\frac{10+12}{2} = 11$
- Q_1 = median of lower half (4, 6, 7, 8, 10) = 7
- Q_3 = median of upper half (12, 15, 18, 20, 22) = 18
