

Course Video: Brainstorming Ideas for Writing Paragraphs

Idea Exploration and Selection Process

0:52 / 7:02

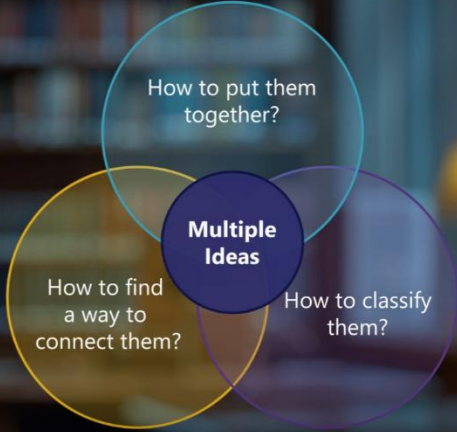

Main idea of your paragraph:

- What you need to use?
- What you don't need to use?
- How you want to use?
- Whether they fit in?
- Whether there is scope for it?
- Whether the word limit allows you to use certain ideas or not use certain ideas?

How Brainstorming works?

▶ 1:40 / 7:02

🔊 🔍 ⋮

▶ 3:31 / 7:02

Water pollution can affect both **physical and mental health**, as certain minerals or components in **drinking water** may harm the body and even influence behaviour.

▶ 3:48 / 7:02

Several strategies you can use for brainstorming

1

Listing

- Write down all your ideas
- Group ideas into categories
- Select the most relevant ideas
- Arrange ideas by importance
- Turn the arranged ideas into sentences for your paragraph.

2

Idea Mapping

- Place your main topic in the centre
- Branch out related ideas with arrows
- Add sub-ideas or supporting details
- Decide what to keep or remove
- Connect the selected ideas
- Write your paragraph.

3

Annotated Bibliography

- Compile a list of research sources
- Note key points from each source
- Categorise and organise the points
- Make connections between ideas
- Write your paragraph
- Refine during editing.
